

# We build the future.

At STARX Industries we efficiently deliver sustainable and environmentally friendly modular solutions. Designed to benefit and increase living standards for both our customers and their surroundings.

Our vision is to invite people into a future way of living by building new perspectives, ways to connect with nature and a sustainable circular aspect in the market. In order to achieve our vision, we will trailblaze a path to delivering module homes that are prepared for future living, in the most efficient way.

We believe that smaller is bigger. Our aim is to introduce our customers to the perspective that smaller housing can bring you more flexibility, closer to nature and provide a bigger living experience, without losing any comfort or style.

Our sustainable solutions made from recycled materials, are produced in our own factory in the Netherlands, which is where the idea behind STARXmodule was born. STARXmodule was founded by a team with strong knowledge and many years of

experience in production and logistics in the building construction business. A team with passion of wanting to evolve the business by introducing it to a new way of building construction to modular solutions.

# DELFT

## CLASSIC WIDEVIEW

Delft invites you to a place to relax in an airy living room of almost 9 square meters, equipped with a kitchen. Adjacent to the living room is also a fully equipped and spacious bathroom. Glass doors that cover a large part of the 3 meter high wall from the living room creates a natural light.

Delft is our tiny house that offers a stylish and calm space close to the nature and relaxing.
