

We build the future.

At STARX Industries we efficiently deliver sustainable and environmentally friendly modular solutions. Designed to benefit and increase living standards for both our customers and their surroundings.

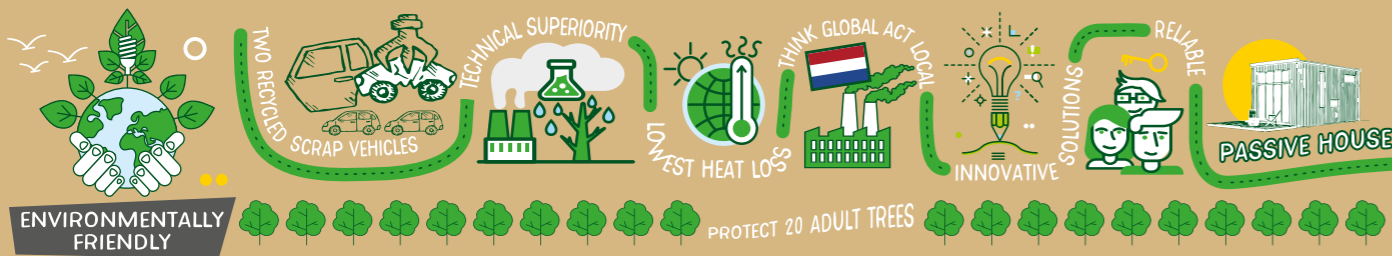

Our vision is to invite people into a future way of living by building new perspectives, ways to connect with nature and a sustainable circular aspect in the market. In order to achieve our vision, we will trailblaze a path to delivering module homes that are prepared for future living, in the most efficient way.

We believe that smaller is bigger. Our aim is to introduce our customers to the perspective that smaller housing can bring you more flexibility, closer to nature and provide a bigger living experience, without losing any comfort or style.

Our sustainable solutions made from recycled materials, are produced in our own factory in the Netherlands, which is where the idea behind STARXmodule was born. STARXmodule was founded by a team with strong knowledge and many years of

experience in production and logistics in the building construction business. A team with passion of wanting to evolve the business by introducing it to a new way of building construction to modular solutions.

HAARLEM

PULPET WIDEVIEW

Haarlem is created with a modern, energy-efficient and biophilic architecture with circadian lighting design. This makes the building both healthy and soothing for humans to live in, while blending in and creating the harmony with nature.

Haarlem is one of our modules consisting of 18 perfectly planned square meters which through its design creates a complete feeling of peace and connection to nature. Haarlem invites to socializing in an airy living room over 18 square meters, also equipped with a kitchen. A few steps from the living room you will find a spacious sleeping loft with plenty of space for both a double bed and workspace. A fully equipped and large bathroom is located adjacent to the living room. Glass sections that cover a large part of the 4 meter high wall from the living room creates a wonderful and natural light.
